

How can it help you?

- Assurance of being in control as out-of-range temperatures will trigger the alarm system to notify you & your team.

- Accessibility of real-time data 24/7 plus you & your team no longer need to perform manual data recording.

TESTO SAVERIST™

A Measurement Data Monitoring Solution

Compliant with GxP and 21 CFR Part 11

- Temperature Mapping
- Installation
- Data Validation

How can we serve you?

We know it is never easy choosing a suitable solution and nothing beats having the real experience.

Just so that you can experience it for yourself, we are offering a **complimentary demonstration plus an on-site trial period!**

What you have to do is to **contact us!**

Current Updates

- For companies dealing with medical devices, the certification to GDPMDS is a mandatory requirement in the application of an Importer's or Wholesaler's Licence
- Existing GDPMDS certified companies have three years to transition to SS 620:2016
- Certifications starting from 1 Sep 2019 are advised to follow **SS 620:2016 – Good Distribution Practice for Medical Devices**
